

## Team 14 bug Report:

Andrew Johannsen

Benton Christiansen

|                    |                                                                              |
|--------------------|------------------------------------------------------------------------------|
| Bug Number         | 1                                                                            |
| Description        | printPhrases was printing a number instead of a letter for the header        |
| Steps to reproduce | Run the program                                                              |
| Expected result    | Printing a letter of the alphabet                                            |
| Fix                | Made it so instead of calling a lower-case letter we called a temp character |

|                    |                                        |
|--------------------|----------------------------------------|
| Bug Number         | 2                                      |
| Description        | Problem with the spacing in the header |
| Steps to reproduce | Run the program                        |

|                 |                                                            |
|-----------------|------------------------------------------------------------|
| Expected result | Solid rows of asterisks on top and below the header letter |
| Fix             | Set the width to zero when printing the header.            |

|                    |                                                                                                                      |
|--------------------|----------------------------------------------------------------------------------------------------------------------|
| Bug Number         | 3                                                                                                                    |
| Description        | Count.txt is printing phrases at the top of the program and printing the same phrases several times unspaced         |
| Steps to reproduce | Run the program                                                                                                      |
| Expected result    | Nothing printed at the top of the program                                                                            |
| Fix                | Stopped printing phrases without first making sure the counts matched, so, we were printing every phrase every time. |

|                    |                                                                   |
|--------------------|-------------------------------------------------------------------|
| Bug Number         | 4                                                                 |
| Description        | Strings did not go into lowercase                                 |
| Steps to reproduce | Run the program                                                   |
| Expected result    | Every string must be lowercase                                    |
| Fix                | Used std::transform to change every character into the lower-case |

|                    |                                                             |
|--------------------|-------------------------------------------------------------|
| Bug Number         | 5                                                           |
| Description        | Quotation marks imported from Word didn't work              |
| Steps to reproduce | Run the Program                                             |
| Expected result    | Normal spacing                                              |
| Fix                | Imported regular quotation marks, program works as planned. |
